**Restoring Pulpless  
Teeth-**  
**Do traditional principles  
still apply?**

**March 16, 2016  
Cedar Knolls, NJ**

## Course Description

Guidelines for restoring pulpless teeth are well established; nevertheless the principles behind these guidelines were developed decades ago primarily from in vitro studies or retrospective studies of metallic posts cemented with conventional cements. New materials and techniques have been introduced for the restoration of pulpless teeth, and there are additional clinical studies in the literature, not only on traditional materials and methods but also on the more novel materials. This presentation will critically review the latest available evidence on restoring pulpless teeth and suggest practical guidelines for the clinician.

Due to space limitation, attendance is limited to dentists only.  
Thank you for understanding.

## Speaker

**Steven M. Morgano DMD**

Dr. Morgano is president of the American Academy of Fixed prosthodontics, and Director of Region 1 (The Northeast Region) of the American College of Prosthodontists. He received his DMD degree from Tufts University School of Dental Medicine, and completed a general practice residency program at Philadelphia General Hospital. He received his specialty certificate in prosthodontics from the Hines Veterans Affairs Medical Center, and is a Diplomate of the American Board of Prosthodontics. Dr. Morgano is Professor and Chairman of the Department of Restorative Dentistry at Rutgers School of Dental Medicine. He has lectured throughout the US, and internationally in 14 different countries. Dr. Morgano has published over 70 articles in the refereed dental literature and has authored 14 textbook chapters.
