6:00pm - 8:30pm

Where:

Kuwata Pan Dent
185 Ridgedale Avenue
Cedar Knolls, NJ 07927

Space is limited!

Doctors Only | RSVP required

Introducing Intraoral Scanning and the New CS 3600

Session Overview:

The CS 3600 intraoral scanner from Carestream Dental puts smarter scanning in your hands. Whether your practice handles restorative, orthodontic or implant cases, the CS 3600 adapts to your needs by making digital impression capture fast and easy. Learn how easy it is to acquire and share true color 2D and 3D images with a direct USB Connection, no trolley and an open architecture for simplified image sharing. The CS 3600 works as part of the integrated CS Solutions CAD/CAM portfolio or as a standalone solution, compatible with open-system CAD software.

Space is limited! Register today!
